

Cashmere Qualities

Pure Cashmere with GCS certification:
2/15nm, 2/28nm, 2/36nm,
2/48nm, 3/68nm

Undyed GCS certified pure cashmere 2/15nm,
2/26nm

Choice of composition in GCS certified
cashmere and RWS wool blends qualities:
80% Merino Wool 20% Cashmere
70% Merino Wool 30% Cashmere
60% Merino Wool 40% Cashmere
50% Merino Wool 50% Cashmere

GRS certified recycled cashmere and blends
qualities:

95% Recycle Cashmere 5% Merino Wool
70% Recycle Cashmere 30% Merino Wool
60% Recycle Cashmere 40% Merino Wool

GRS and GOT certified quality:
30% Recycle Cashmere 70% Organic Cotton

CASHMERE INSPIRATION

Our aim is not only to be a supplier of classic cashmere but also to offer bespoke creativity to customers by giving our cashmere yarns their own unique identity.

We only use the very best Inner Mongolian cashmere fibers to guarantee our cashmere is absolutely pure, creating yarns that are soft, lustrous, and wear well.

*By spinning our own yarns & developing innovative products - Neo-Concept offers a sustainable choice of materials and special programs that are tailored for specific business partners. Please contact our Sales team at info@neo-concept.com for details.

CLASSIC LUXURY

NEO-CONCEPT has made a conscious business decision to grow the sustainable aspect of our yarn development.

Our fibers are obtained from sources which maintain the highest possible standards of animal welfare and care for the environment.

The Australia-origin merino wool is responsibly sourced including the use of other natural fibers derived from animals.

& 3/50nm Nylon

GRS certified recycled cotton and blends qualities,
available in regular tone, marl effect or with neps:

1/6nm, 1/12nm, 2/12nm 55% Recycled Cotton
25% Other Fiber 20% Cashplus @#

REBORN FOR NATURAL FIBRE BLENDED TEXTILES

NEO-CONCEPT has special partnerships with eco-conscious yarn mills, to ensure that more customers and especially the final consumer can share our same passion for exploring innovative ethical advancements.

The post-consumer materials recycle processes are entirely eco-friendly: no dyes or chemical treatment to yarns. There is also zero usage of H₂O to reduce pollution and waste in the whole manufacturing process.

www.neo-concept.com

Cashplus @ is dyed at lower temperatures than conventional polyester, therefore less energy and carbon is released while guaranteeing color fastness and improved durability.

*By spinning our own yarns & developing innovative products - Neo-Concept offers a sustainable choice of materials and special programs that are tailored for specific business partners. Please contact our Sales team at info@neo-concept.com for details.

UPCYCLING PLASTIC BOTTLES

NEO-CONCEPT has made a conscious business decision to grow the sustainable aspect of our yarn development and environmentally friendly practices.

We encourage the upcycling of daily waste, e.g. plastic bottles that are regenerated into the GRS (Global Recycle Standards) Certified polyester fiber. Furthermore, the reinvented polyester, Cashplus®, is also created and spun with an ethical process.

Naturally Healthy & Wellness Textile

Greater awareness of hygiene and cleanliness leads to protective materials becoming central to everyday living. With protection efforts ramped up in light of the coronavirus pandemic, there is a revolution of defensive textiles that reassure us and shield us from disease and pollution.

NEO-CONCEPT explores how health-promoting benefits in textiles will bring enhanced comfort, wellness and performance to the consumer: the patented HerbA® material, with cellulose blends from the Artemisia plant, which has antibacterial properties so that HerbA® naturally blocks harmful germs. The regenerated cellulose sources (viscose) comes from a well-managed farm, with Forest Stewardship Council (FSC) membership. Our suppliers eco-consciously promote social, ecological, and economic rights.

www.neo-concept.com

Seasonless fibers in a variety of good quality natural fibres, such as silk, linen, cotton and wool, and is particularly good for fine gauge sweater and fine knits:

2/32's	100% HerbA®
2/50nm & 3/50nm	75% HerbA® 25% Silk
2/50nm & 3/50nm	70% HerbA® 30% Cotton
2/50nm & 3/50nm	70% HerbA® 30% Linen
2/50nm	70% HerbA® 30% Wool

COTTON HERBA®

WOOL HERBA®

COPPER ION®

We also integrate Copper Ion technology, for defensive textiles that are fashionable. The woven combinations are generally soft, skin-friendly, highly antibacterial, breathable, and comfortable.

74% Polyester 26% HerbA® 0.3% Copper Ion 155gsm
22% Silk 78% HerbA® weighted in 21mm & 17mm

2/32's & 2/40's 100% Organic Cotton
2/50nm 60% Organic Cotton 40% Recycled Polyester
1/15nm 70% Organic Cotton 30% Recycled Cashmere
2/15nm 59% Organic Cotton 30% Recycled Wool 11% Nylon

ETHICAL FARMING

Our long term target is to find feasible and still beautiful eco solutions to the fashion industry we love! We aim to develop without harming our environment through raw materials, products and manufacturing processes. We encourage good farm practices and reducing water and chemical usage that improves livelihoods and economic development across many industries.

The Global Organic Textile Standard and Organic Content Standard are the world's leading standards of ethical farming for products. They stand for better animal welfare, environmental sustainability, fiber quality, traceability, and social responsibility for our planet, and our people.
